1. (Amended) A method for managing entertainment system data, comprising:
- obtaining a record corresponding to a first entertainment selection that is selected;
- presenting a selectable identifier corresponding to a first set of entertainment system data in the obtained record on a display device; and
- performing a search for a second entertainment selection having a corresponding second set of entertainment system data related to the first set of entertainment system data when the selectable identifier is selected;
- and
- presenting a result of the search on the display device.
